

World Database Exercises

Run the world.sql script to create the world database with the following tables:

Use the MySQLWorkbench to examine the table columns.

Exercises:

Using MySQLWorkbench write SQL queries for the following:

1. What is the surface area of Denmark?
2. Which country in Europe has the smallest population and what is it?
3. Which country has the longest life expectancy?
4. What is the average life expectancy in Africa?
5. How many countries are there in South America? List them.
6. List the names of countries and their corresponding capital cities.
7. List the names of countries which do not have a registered capital.
8. List the names of countries where the official language is Danish.

9. Find the total world population, grouped by continent in descending order (with names of continents).
10. The population of Denmark is actually 5,961,249. Update the table to reflect this.
11. Add Roskilde (population 52,580) to the city table.
